EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on November 21, 2003, assigned serial 10/719,628 and titled "PHASE RECOVERY FILTERING TECHNIQUE FOR SCP THROUGHPUT SHORTAGE".

2. The preliminary amendment filed on April 07, 2005 has been entered and the specification has been amended.

3. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

a. After carefully reviewing the application in light of the prior art of record, the amended claims and additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

b. Although the prior art disclose several claimed limitations, none of the references teaches phase recovery filtering techniques for spacecraft computer processor (SCP) throughput shortage which includes at least the steps of collecting throughput impact data at a lower sampling rate, examining current sampled-data control system stability margins, evaluating stability margins under a new slowed-down sampled-data system, modeling a sampler and a zero-order-hold device in a z-transform, inverting the slowed-down sample data device model as a new filter compensation, and recomputing the control system stability margins to verify a recovered phase loss (claims 1, 8, 15 and 20).

c. Claims 1-25 are allowable over the prior art of record.
